### WORLD'S LARGEST POOL

For those who prefer to lounge under a parasol during their vacation rather than playing Indiana Jones in the desert, a company called Crystal Lagoons is in the final stage of constructing the world's largest swimming pool in the desert near the coastal resort of Sharm el Sheikh. The new development, which also includes hotels, homes and shopping centers, consists of twelve crystal clear lagoons. The largest one covers an area of 8.8 hectares, enough to land it a place in the Guinness Book of World Records. This remarkable resort will open its doors in July this year.
