## The Most Expensive Pools (2010)

You have seen the most expensive house, but the most expensive pool is not actually in the most expensive house but even more expensive than the house! A pool that you could even sail your boat in:

**City Star, Cairo**

After the wonders pyramids, they bring you the wonder of living in an extremely luxury life, with an extreme pool. The pool is 21 acres (8.5 hectares), and the construction work of the pool itself is **RM16 billion** (USD 5.5 billion). The pool is used by residents and guests of the hotel from estimated 30,000 condos. It would be a gigantic lagoon water world. The people behind this lagoon, Crystal Lagoons are also responsible for a lot of other expensive lagoon projects, and after the City Star they also would move on to another lagoon project worth RM 36 billion (USD 12 billion). If the project is successful, it would have to edit this post, awwwww~

Alright... You now have the most expensive car, house and pool. Own these 3 and you won't RIP, you would wish you could spend eternally with it! I hate long posts hence I will keep this short, there are more expensive things coming up, so save up!!
